

# Incident Reporting in Schools

## Release 1, 2018 (01 January 2018 – 6 July 2018)

### How schools manage the safety and security of its students and staff.

Our schools are among the safest places in our community for children and young people. However, from time to time, incidents do affect schools just as they affect communities and society as a whole. Following such an incident, the principal notifies the Department's Incident Report and Support Hotline so support and advice can be provided to assist the school with the management of the incident. If the principal believes the incident may involve a criminal offence they are required to also notify the NSW Police Force.

The Incident Report and Support Hotline is available to assist principals 24 hours a day, seven days a week. Senior police and incident support officers in the unit provide immediate support and advice on the management of any school-related incident reported.

Through the NSW Department of Education's commitment to improving transparency and ease of access to information, incident reports are being made available to the public. In doing so, the Department is committed to the welfare of students and staff in NSW public schools. As such, references have been removed which could expose a person to a risk of harm or which reveals the identities, or the personal/health information of students, school staff and community members. Information that may prejudice an investigation has also been removed.

Publishing these reports informs the community about incidents in public schools and how the Department supports schools through incidents while still protecting the identity of students and staff.

The introduction of a new incident reporting database in January 2015 has changed the format of the statistics presented and the release of individual incident reports. Schools are required to report incidents to the Incident Report and Support Hotline relating to activities such as violence and weapons; illegal drugs; other criminal

activities; natural disasters; suspected suicides; and missing students if there is a concern for their safety to the student.

This increased range of categories has resulted in an increase in the number of schools reporting incidents and the number of incidents reported.

The categories of incidents that are reported by schools now include drugs, technology, violence, weapons and welfare. This restructure of categories enables the Department to better identify areas it can target with additional support and training delivered by the Health and Safety Directorate on a regular basis and serves to assist schools' abilities to effectively manage incidents when and if they occur.

To align with the Department's restructure from 10 school Regions to 66 Principals Networks, incidents are now recorded and reported by Principals Network. Future comparative reporting based on the improved incident reporting system will further assist in the analysis of data and subsequent targeted support to schools.

The number of incidents that are reported from one date range to the next do vary and this is an expected fluctuation due to the relatively small number of incidents that are reported from more than 2,200 schools with a student population in excess of 791,000. Consequently, the percentage variations are not significant and the relatively small number of incidents indicates that schools continue to be one of the safest places for students in our community.
